Review Title: Zeb-Thunder Problems Faced by Many people

Rating: 3

Review Text: Hello Guys, the most important thing that every future buyer should know is that only a few guys get this product in good condition. Most of the buyers face problems like sound imbalance, no sound on one side, damaged products, cables not working well etc. Check your headphones in every possible way so that you do not face any problems. Other factors like weight, mic quality, appearance, service, and sound quality are good. But the durability of this product is very bad. It is fully made of plastic. So if you want to use headphones in conditions where they can be damaged easily, don't buy this one. The major problem I faced using these headphones is the quality of the AUX cables is very bad. It is not good for gaming. For gaming, you can instead buy any wired headphones. For music, this headphone is fantastic. No choice other than this at this price range. Thank you for reading just wanna tell you about this cool headphone.

Review Title: review after ~4 months of use:

Rating: 4

Review Text: I have got the black color for me. Battery backup is too good and you can use with aux cable to reserve battery. Sound quality is okay but in higher volume, sound leaks and anyone near you can hear clearly. Noise cancellation is almost none, and call quality is ok(dual pairing is available so if you receive a call on phone and on your pc some video was playing it will get paused automatically , but the problem is call quality gets seriously degraded if you turn on the video - call will get garbled and you wouldn't be able to understand a single word of the person you are talking to. ear sponge quality is ok , you get one on head , and get ready to have sweaty ears in long session. Sponge can be connected again using thin spoon if they get open from the ear cup. Random disconnection is here and there and there is some minor delay - mind it if you are planning to use as gaming headphone , singleplayer is ok but not for multiplayer. biggest drawback is there is no system to fold the earcups. overall good budget headphone.

Review Title: Zeb thunder pro

Rating: 3

Review Text: The product is good but they are faking too much by telling there's ENC and Gaming mode while there's no feature like that, it's just a normal Bluetooth headphone. However portability is good, comfort is good durability i would say cheap it can break easily also aux cable is not durable, sound quality good for this price range.

Review Title: Review of Zebronics Zeb Thunder Bluetooth headphone

Rating: 3

Review Text: I bought this product about 2.5 months back, My purpose of buying this headphone is to watch lectures, binge watching of movies I was wondering for budget friendly headphone under rupees 1,000. So, After using this product for about 2.5 months and still using it. I would like to share the likes and dislikes of this product based on my usage. Likes : 1) Sound quality is good and crisp great for listening lectures and watching movies and other content. 2) Battery life is also good it gives output of about 15 hours my daily usage is about 4-5 hours. 3) Bluetooth range is quite good for this budget. Dislikes : 1) It's leather quality is very bad not satisfied with its quality to the leather was ripped out within just 2 months. 2) the plastic quality is not so good you can get scratches on its body easily. 3) it consumes more time to get charge it takes around 3-4 hours for 100% charging. 4) the glue used in this headphones cushion are not applied properly it comes out of the body within 1 month only. 5) the noise cancellation is not good you can easily hear outdoor activities sound Even at full volume. Based on this budget it's a good product from Indian Brands Zebronics but comes with a lot of comprises. If you really want quality good headphones atleast go for budget higher than rupees 2,500 or select other brands like sony, boat and other brands.

Review Title: GOOD PRODUCT CONSIDERING THE PRICE

Rating: 4

Review Text: Purchased for 600 rupees and using for last 9 months continuously. Product is good if you consider the price. Battery back up is 6-7 hours till now. Not so much durable, but if you use it carefully it can last upto 1-1.5 years. Bluetooth connectivity works upto 15-20 feet at max. Everything is ok.

Review Title: Superior Sound and Comfort: A Review of Earbuds

Rating: 4

Review Text: Title: Superior Sound and Comfort: A Review of Earbuds Rating: ★★★★★ I recently had the opportunity to try out a pair of earbuds that have genuinely enhanced my listening experience. These earbuds have impressed me with their sound quality, comfort, and overall performance. Allow me to share my detailed review. First and foremost, the sound quality delivered by these earbuds is exceptional. The audio is clear, balanced, and immersive, allowing me to truly appreciate the nuances in my favorite music. The bass is rich and punchy, while the midrange and treble frequencies are well-defined and crisp. Whether I'm listening to classical melodies or energetic rock tunes, these earbuds consistently deliver an enjoyable audio experience. Comfort is another aspect where these earbuds shine. They come with a variety of ear tip sizes, ensuring a secure and comfortable fit for different ear shapes. The lightweight design and ergonomic shape make them easy to wear for extended periods without causing discomfort or fatigue. I appreciate that they stay securely in place, even during workouts or active movements. The battery life of these earbuds is commendable as well. They provide a substantial playtime on a single charge, allowing for uninterrupted listening throughout the day. The charging case is compact and portable, making it convenient to carry and ensuring that the earbuds are always ready to use. One feature I particularly appreciate is the seamless Bluetooth connectivity. Pairing the earbuds with my devices was effortless, and the connection remained stable without any dropouts. The wireless range is impressive, allowing me to move around without being tethered to my device. Additionally, the earbuds feature intuitive touch controls, allowing easy access to play/pause, volume adjustment, and call management. While the overall performance of these earbuds is exceptional, I did encounter a minor drawback. The noise isolation could be improved, especially in louder environments. Although they provide some passive noise reduction, ambient sounds can still be heard, which may affect the immersion in certain situations. In conclusion, these earbuds have impressed me with their superior sound quality, comfort, and convenient features. They offer an immersive listening experience, and their long battery life ensures uninterrupted enjoyment. Despite a minor limitation in noise isolation, these earbuds are a reliable choice for music enthusiasts and individuals seeking a wireless audio solution. I would recommend them to anyone looking for a high-quality pair of earbuds.

Review Title: Boulton Audio Z40 Pro - Your Ultimate Companion for Immersive Sound

Rating: 4

Review Text: The Boulton Audio Z40 Pro is a solid choice for those looking for an affordable yet feature-packed pair of earphones. Here are some of its standout features: 1. Sound Quality: The Z40 Pro offers immersive sound quality with deep bass and crisp highs, allowing you to enjoy your music, movies, and games with clarity. 2. Active Noise Cancellation (ANC): This feature helps block out

ambient noise, allowing you to focus on your audio experience without distractions from the outside world. 3. Comfortable Fit: The earphones come with different-sized ear tips to ensure a comfortable and secure fit for extended listening sessions. 4. Battery Life: With a long battery life, you can enjoy hours of uninterrupted listening on a single charge. 5. Built-in Mic: The Z40 Pro features a built-in microphone for hands-free calling and voice assistant support, making it convenient for on-the-go use. 6. Durable Design: The earphones are built to last with sturdy construction, making them suitable for everyday use. 7. Bluetooth Connectivity: With Bluetooth connectivity, you can easily pair the earphones with your smartphone, tablet, or other Bluetooth-enabled devices, providing wireless freedom. Overall, the Boulton Audio Z40 Pro offers a compelling combination of performance, features, and affordability, making it a great choice for anyone in the market for a new pair of earphones.

Review Title: Attractive & good earbuds

Rating: 3

Review Text: Earbuds looks good and sound quality was nice. Charge stays for long time. But the problem is no notification sound for incoming calls if you're listening songs and receive call it'll turn into silent, if you aren't listening to song you don't know the call since it'll be silent. Another issue which I faced while driving with helmet receiver can't hear us. But noise cancelation is superb while driving without helmet receivers can clearly able to listen us.

Review Title: Unleash Pure Audio Bliss: Boulton Audio Z40 True Wireless In-Ear Earbuds

Rating: 4

Review Text: The Boulton Audio Z40 True Wireless In-Ear Earbuds redefine the audio experience, offering a combination of cutting-edge technology, immersive sound quality, and ergonomic design that sets them apart in the crowded wireless earbuds market. From the moment I first popped these earbuds in, I was blown away by the clarity and depth of the sound they delivered. Powered by advanced drivers and tuned by audio experts, the Z40 earbuds produce rich, balanced sound with crisp highs, deep lows, and a wide soundstage that immerses you in your music like never before. Whether you're listening to your favorite tracks, streaming podcasts, or watching movies, every note and nuance is reproduced with astonishing fidelity. One of the standout features of the Z40 earbuds is their ergonomic design, which ensures a secure and comfortable fit for extended listening sessions. The soft silicone ear tips provide a snug seal that blocks out external noise, allowing you to focus solely on your audio experience. Additionally, the lightweight construction and compact form factor make these earbuds ideal for use on the go, whether you're commuting, working out, or simply relaxing at home. The touch controls on the earbuds offer intuitive navigation and playback control, allowing you to adjust volume, skip tracks, answer calls, and activate voice assistants with ease. The inclusion of Bluetooth 5.0 technology ensures a stable and reliable connection to your device, with minimal latency and dropout, even in busy urban environments. I was also impressed by the Z40 earbuds' long battery life, which provides up to 8 hours of continuous playback on a single charge. With the included charging case, you can enjoy an additional 24 hours of battery life, ensuring that your music never has to stop, even during the longest of journeys. In conclusion, the Boulton Audio Z40 True Wireless In-Ear Earbuds are a stellar choice for anyone in search of premium audio performance and unparalleled comfort in a wireless earbud package. With their immersive sound quality, secure fit, intuitive controls, and long battery life, these earbuds deliver a listening experience that truly transcends expectations. Whether you're a music lover, a podcast enthusiast, or a cinephile, the Z40 earbuds are sure to become your new go-to audio companion recommended! ■

Review Title: Great looks, great sound quality but very uncomfortable.

Rating: 4

Review Text: The sound quality is great, I tried playing songs and general sound effects to test it. The look is unique, I liked it a lot. Unfortunately my fund ended quickly because of the ear pain the earbud caused due to very pointy tip, the physical tip that us under the silicon tip covering. That tip is of a curved rectangle shape which caused pain in the ear almost immediately. Would definitely recommend for people with large ears but for the small ears I would just not recommend it. Honetly this product has great pitential but lacks the comfort as of now.

Review Title: Bang for Buck, but could have been placed as a premium product

Rating: 4

Review Text: REVIEW AFTER 1 MONTH 1 major irritating feature I've found is its power saving mode. If you connect to bluetooth, and do not play anything for say 5 mins, it gets POWER OFF. While this is good, it is super irritating. When I'm getting only my bike, I wear these earbuds, wear helmet, gloves etc and before I can start the bike and select play, it gets power off. Forking irritating !! REVIEW AFTER 1 WEEK Good Value product. I liked the product designing. However, the finish on the case gives it a cheap plastic look. Could have used a slightly different polymer for the case. They could also have made this in metal, and increased the price to around 2000-2500, would still have bought. The "Boulton Amp" app is cherry on the icing. Overall good buy if you're not concerned about the cheap look of the case.

Review Title: OnePlus Buds 3 in Ear TWS - The Best One

Rating: 5

Review Text: I recently got my OnePlus Buds 3 In Ear TWS Bluetooth Earbuds, and I'm very much impressed by the quality and performance. The build quality is exceptional, exuding a premium feel that's evident the moment you hold them. The materials used are top-notch, ensuring durability and longevity. The size of the earbuds is just right, providing a comfortable fit that stays in place securely, even during extended use. One of the best features for me is the noise cancellation capability, which works like a pro, immersing me completely in my audio experience without any external distractions. Additionally, the charging speed is impressive, ensuring minimal downtime between uses. Compact and easy to carry around, these earbuds are perfect for on-the-go use, whether I'm commuting, working out, or simply relaxing at home. In my opinion, they truly are best in class and I would highly recommend them to anyone in search of premium quality earbuds with exceptional performance. Was actually planned for Apple one but buying this I am really happy and satisfied. Recommending to others too

Product Title: OnePlus Buds 3 in Ear TWS Bluetooth Earbuds with Upto 49dB Smart Adaptive Noise Cancellation, Hi-Res Sound Quality, Sliding Volume Control, 10mins for 7Hours Fast Charging with Upto 44Hrs Playback

Review Title: It's amazing.

Rating: 4

Review Text: You basically only have two other alternatives at this price: the Oppo enco air 3 pro and Realme air 5 pro. They have their own flaws. Realme's doesn't have IP for dust (IPx5) which is a big no-no. This is a bit pricier than the other two. The sound quality and multiple-endpoint connection are great. But the cons: ANC is average imo. But still good for the price. Buds don't securely fit in my ear. The app's test says perfect fit, which is wrong. As a result, using the volume up/down slider is a bit difficult as the buds sometimes fall out. If the fit is even a bit off the bass loses power so I'm having to adjust every now and then LHDC codec. It's only supported by Redmi, OnePlus and Oppo (I think?) phones. The LDAC codec present in Realme & oppo earbuds are rather ubiquitous. P.S. This is my first earbuds, so your mileage regarding security of fit might vary.

Review Title: Good connectivity if you have oneplus device

Rating: 4

Review Text: I am using this with oneplus 12R, it works very well. Even connects very nicely to my oneplus pad. So it's a good choice if you're in oneplus ecosystem. However, the sound out of box was too muffled and bass rich for my taste. We can adjust EQ in the settings and after few modifications I'm very happy with this headphones, it sounds good now with enough treble and vocals are better after changing it to new EQ setting. ANC and Mic works well too. Overall, it's definitely a good product for the price they are asking considering you change the EQ settings as it is too much focused on bass by default. Hope it helps :)

Review Title: Great earphones, decent noise cancellation but not that great

Rating: 4

Review Text: Quite cool design that looks very unique, however, the noise cancellation is not that great and doesn't match the level how it's being promoted. In traffic you have to speak very loudly and in places of less noise too you have to speak at a higher level than normal. To me, the price should've been between 3-4k at max.

Product Title: OnePlus Buds 3 in Ear TWS Bluetooth Earbuds with Upto 49dB Smart Adaptive Noise Cancellation,Hi-Res Sound Quality,Sliding Volume Control,10mins for 7Hours Fast Charging with Upto 44Hrs Playback

Review Title: Good product for the price

Rating: 4

Review Text: The earphones are good for the price. The audio quality is good and the clarity is fine as well. The case and earphones are really light weight. The other good thing about it is that we could connect 2 devices at a time. I can watch a movie on my laptop and still continue to pick up my phone using the earphone if I get a call. Apart from all this, my favourite feature is the fact that we can control the volume by sliding of the side. This is not something that is available in most other earphones at this price range. My only concern at this point is that it gets accidentally disconnected or pauses videos due to its high sensitivity.

Review Title: Great for calls on phone and PC

Rating: 4

Review Text: I purchased these earbuds principally for calls on phone and for virtual meetings on PC. I have used these buds for about 10 days fairly intensively, and I can say that they meet my requirement for calls very well. Call quality at both ends is very good. The ANC works well to block background noise to an extent. The microphones also block out background noise to a good extent ensuring that calls can be taken in noisy environments without much interference. I was previously using a "professional grade" Bluetooth headphone from Jabra and I can say that the call quality is definitely comparable. The buds have Bluetooth multipoint connectivity which means that the buds connect simultaneously to both my phone and PC. The buds automatically connect to whichever device (PC or phone) which is transmitting audio. However, to switch devices, we need to manually pause audio on one device and start audio on the other. There is no other way to force the buds to switch from one audio source to the other. This gets tricky if you are constantly moving between phone and PC - there are times when the buds don't switch over because some app or the other which is transmitting audio (say a browser page with a video which is playing). Having an express gesture for switching audio streams would have been very useful. Also there is a slight lag when switching from one device to another - don't expect to immediately stop a voice call on phone and immediately switch to a meeting on the PC. You will have a 2-3 second lag for the handover. There is also no gesture for "mute" on the headphones. You will need to pull out your device to mute / unmute. Can get a bit annoying if you are taking a call while walking. These issues are however minor. The call quality and convenience of the buds is really outstanding. Heartily recommend to anyone who is looking for good TWS buds for use at work. --- Update after more than a month of usage. The buds tend to work themselves loose after half

hour or so and need to be adjusted. Can be a bit annoying if the buds come loose when your hands aren't free, such as when you are cooking. Of course the fit may vary from person-to-person. The case is also somewhat flimsy. With just about a month of usage the case has collected nicks and scratches from minor day-to-day wear and tear. Might be a good idea to get a cover for the case.

Review Title: BIG Thanks to BOSE to bring this to INDIA ****

Rating: 5

Review Text: I have been off a huge support to Bose on innovations for these open style music listening as it so important to maintain a good hearing health. We all abuse ears with music and outside environmental hazards, its important to sometimes keep it quiet but at same time listen to something in private . This the newest to the line up has not only helps to keep aware of your surrounding (Indian conditions its challenging) but you can make it habit if you practise . The sound quality is excellent and very comfortable. I have been writing to Bose to keep the innovations open as I was upset they discontinued the Bose frames line up (another GEM). The main disadvantage I find here is the price but again I See this is cheapest in India compared to other parts of the world . To summarise its a niche product and will gain potential soon as we need to reduce using in-ears to escape from the environment. Yes Inner ears are unavoidable but at-least in quieter environment this would be an excellent choice. Thanks BOSE.

Review Title: ZEBRONICS Zeb-Bro Wired Earphones: Decent Sound but Lacks Durability

Rating: 4

Review Text: I recently purchased the ZEBRONICS Zeb-Bro Wired Earphones, and while they offer decent sound quality and a comfortable fit, there are some concerns regarding their durability. Let's start with the positives. The earphones provide a snug fit, ensuring comfort even during long listening sessions. The 10mm drivers deliver satisfactory sound performance, allowing you to enjoy your favorite music and audio with clarity. The passive noise cancellation feature is an added bonus, as it helps immerse you in your audio experience by reducing external noise distractions. Connecting the earphones to your device is a straightforward process. Simply plug in the 3.5mm audio jack, and within a few seconds, the earphones sync with your phone or tablet, ready to deliver audio. On the downside, the build quality of the earphone cable raises concerns. Some users have reported that the wires are

not as sturdy as expected, making them susceptible to damage and tangling. This weakness in the wire construction may impact the longevity of the earphones, requiring extra care and attention during use and storage. The ZEBRONICS Zeb-Bro Wired Earphones come in a sleek design and are available in multiple color options, including Black, Blue, Green, Red, and White, allowing you to choose the one that suits your style. In terms of technical specifications, the earphones have an impedance of 16 Ω and a frequency response range of 20Hz-20kHz. The 1.2-meter cable length provides adequate flexibility for comfortable usage. It's important to note that these earphones come with a 6-month warranty, which provides some assurance in case of any manufacturing defects or malfunctions within the specified period. In conclusion, the ZEBRONICS Zeb-Bro Wired Earphones offer decent sound quality and a comfortable fit, making them suitable for everyday use. However, the durability concerns surrounding the wire strength are worth considering. If you prioritize longevity and robustness in your earphone choice, you may want to explore other options. Nevertheless, if you handle them with care, these earphones can provide an enjoyable audio experience at an affordable price point.

Review Title: ZEBRONICS Zeb-Bro Wired Earphones: The Good, the Bad, and the Wires

Rating: 4

Review Text: The ZEBRONICS Zeb-Bro Wired Earphones present a mixed bag of features, catering to both audio quality enthusiasts and comfort seekers. With a snug fit and 10mm drivers, these earphones ensure a comfortable listening experience coupled with satisfactory sound performance. The passive noise cancellation feature enhances immersion by minimizing external distractions, ideal for music aficionados or those seeking solace in audiobooks during commutes. Connecting these earphones is hassle-free, thanks to the straightforward plug-and-play mechanism. However, concerns arise regarding the durability of the earphone cable. Users have reported issues with wire sturdiness, highlighting susceptibility to tangling and damage. While the sleek design and color variety add aesthetic appeal, the compromise in build quality prompts cautious handling to prolong their lifespan. Despite durability concerns, the ZEBRONICS Zeb-Bro Wired Earphones boast technical specifications such as a 16 Ω impedance and a frequency response range of 20Hz-20kHz. The 1.2-meter cable offers adequate flexibility for daily use. Additionally, the inclusion of a 6-month warranty provides reassurance against potential manufacturing defects, offering peace of mind to consumers. In summary, the ZEBRONICS Zeb-Bro Wired Earphones deliver a comfortable fit and decent sound quality, suitable for regular use. However, prospective buyers should weigh the durability issues against their preferences. While these earphones offer an enjoyable audio experience at an affordable price point, those prioritizing longevity may opt for alternatives with sturdier construction. Nonetheless, with proper care, these earphones serve as a budget-friendly option for casual listeners.

Review Text: It's been about 3 months, since I am using this earphone and trust me these will meet upto your expectations. Whether it's about sound quality, bass or design and weight of course. I too have boat's neckband(with prize 8-10 times more than its) and using both for long time. The sound has a little variation in terms of bass and quality of course(what else we can expect in this price ■■180) but good for daily use. The only negative side I will point out is about the quality of the product. The wire quality is not upto the mark (3/5), you have to handle it carefully and the earbuds are made of plastic material. Also the the button in the microphone is not at all useful, sometimes it works only to stop ongoing songs but you can't increase or decrease the volume. Overall I'll give it 4■under the price I bought. An important suggestion:- If you find this product under the range of ■200.And dont want to go for some high rate earhones, just go for it. It would be a good product to you. Otherwise, you can check out for some other earphones under 500. Some of them are boat or MI earphones and boult audio bass earphones. ■ Hope this will be helpful for you guys.■

Review Title: Zebronics Headphones - A Budget-Friendly Delight!

Rating: 4

Review Text: I recently purchased the Zebronics Headphones from Amazon, and I must say, they are a delightful surprise, especially considering their budget-friendly price. These headphones have impressed me with their overall performance and features. First and foremost, the sound quality is surprisingly good for headphones in this price range. The audio is clear and well-balanced, with decent bass that adds depth to music and enhances the overall listening experience. Whether I'm enjoying my favorite tracks, watching movies, or even gaming, the Zebronics headphones deliver satisfactory sound without any distortion. Comfort is another strong suit of these headphones. The adjustable headband and soft cushioned ear cups provide a snug fit and can be worn comfortably for extended periods without causing discomfort or fatigue. The design is also lightweight, making them easy to carry around, which is perfect for my on-the-go lifestyle. I also appreciate the built-in microphone, which allows me to take calls hands-free while using the headphones. The call quality is clear, and I haven't encountered any issues with voice clarity during phone conversations. The headphones' build quality is decent, considering their affordable price point. Although they are mostly made of plastic, they don't feel flimsy or fragile. However, I would advise handling them with care to ensure their longevity. One minor drawback I noticed is the absence of active noise cancellation, which is expected at this price. While they do offer some passive noise isolation, it may not completely block out loud external noises. Nevertheless, it's not a deal-breaker for me, given the headphones' overall performance and affordability. In terms of connectivity, these headphones offer versatility with both wired and wireless options. I can use the included AUX cable to connect to various devices, and the Bluetooth connectivity works seamlessly with my smartphone and laptop. In conclusion, the Zebronics Headphones are an excellent choice for budget-conscious consumers looking for a decent audio experience. Their sound quality, comfort, and versatile connectivity options make them a reliable companion for music enthusiasts and casual users alike. While they may lack some advanced features found in higher-end models, these headphones offer great value for money and have pleasantly surprised me with their performance.

Review Title: Value for money and good NC

Rating: 5

Review Text: In one word, good "VALUE FOR MONEY". Bye bye. For those who want all goods and bads here they are: 1. Build Quality a. On Ear headphones (not over ear headphones) b. Lighter overall weight than its competitors (187 grams) c. Neither too Sturdy not too Flimsy d. Foldable (earcups) e. Chance for fingerprint attraction f. Very precisely fits my beefy head g. Ear cups are soft and will suit if u have average sized ears h. Matte finish (surface is not reflective) i. Fit on my ears is rather small and its not as good as over head earphones. 2. Sound Quality a. Great Noise Cancellation for this price b. Volume can get pretty loud c. Heavy Audio leakage d. Great Bass e. Mids are decent 3. Ports & Buttons a. USB - C charging port b. 3.5mm headphone Jack c. SD Card slot that supports my 32GB Sandisk d. Tactical buttons usable for almost all media controls including voice assistant 4. One Year Warranty card which u should claim 5. Battery life good lasted me 5 days for a power user like me 6. Audio Quality is great - Very balanced instead of fancy stuff like Bass boosted, etc. Thus giving user the control to equalize their songs. 7. Bluetooth Connectivity is alright, only once out of a week did it struggle to connect to my phone but still whenever I turn on my bluetooth pairs up quickly. 8. Take

occasional breaks while using this as earcups are big enough to cover the hollow parts of your ear at the same time fitting perfectly on top of my skeletal structures thus creating pain with continuous usage.

Review Title: Buyer Beware: My Headphone Woes and a Warranty Woeful Worse

Rating: 1

Review Text: I'm writing this review to save you the sound-shattering disappointment I experienced with the NOISE TWO WIRELESS. These headphones promised audio bliss, but delivered a symphony of frustration. Let's start with the build quality. Imagine a fragile butterfly crafted from recycled plastic – that's about as sturdy as these headphones felt. They weren't subjected to any mosh pits or extreme sports, just the gentle jostle of daily life. Yet, one fateful morning, a sickening crack echoed through my ears as the headband snapped like a stale cracker. Now, I'm a reasonable person. Accidents happen. So, I contacted NOISE support, warranty in hand, expecting a swift resolution. What I got was a masterclass in customer service limbo. They dragged their feet through emails, requested photos from every angle (including a panoramic shot of my eardrums, apparently), and ultimately declared the damage "not covered" under some obscure clause about "improper use" (which, in their interpretation, apparently included breathing). So, here I am, stuck with a broken pair of headphones and a bitter taste in my mouth. The audio, while it lasted, was decent, but not worth the hassle and heartbreak. My advice? Steer clear of this brand and its flimsy promises. Unless you enjoy the thrill of an audiophile rollercoaster that ends in a crash landing of disappointment, that is. For those seeking a more constructive alternative: Do your research! Read reviews from multiple sources before diving headfirst into any headphones. Prioritize build quality. Look for materials known for their durability, not just their sleekness. Understand the warranty terms thoroughly. Don't get blindsided by hidden clauses or exclusions. Remember, your ears deserve better than a sonic heartbreak. Choose wisely, and may your listening experience be filled with joy, not cracks and customer service nightmares.

Review Title: Mixed Experience with Defects and Remarkable Features

Rating: 4

Review Text: I've had my headphones for a while now, and I'd like to share my thoughts on them. Let's start with the not-so-great aspects: ■Bad Qualities■ 1. Defective Headphone From day one, I noticed a significant issue with the right side of my headphones. When I turn the volume up to the maximum or above the recommended level, it starts making loud and disturbing noises like "zzz zzz" alongside the audio I'm listening to. This makes it quite challenging to understand what's being played. Fortunately, I usually keep the volume at a moderate level, so it's manageable for me. I considered getting them replaced, but the reputation of noise company' poor customer service discouraged me.. 2. Sound leakage: Another downside is that when I crank up the volume, people around me can hear what I'm listening to through my headphones, which can be a bit embarrassing in public spaces. Now, let's talk about the positive aspects: ■Good Qualities■ 1. Impressive Battery Life: Charging these headphones for just one hour lasts me almost an entire week, which is incredibly convenient. 2. Excellent Sound Quality: At the recommended volume levels, the sound quality is fantastic, providing a rich and immersive listening experience. 3. Noise Isolation: These headphones do an excellent job of isolating external noise, making it possible for me to enjoy my music even in crowded places like Mumbai local trains. 4. Stylish Design: I must say these headphones look good. They have a sleek and modern design that complements my style. 5. Comfortable Fit: They are quite comfortable to wear for extended periods, which is perfect for long commutes or extended listening sessions. 6. Easy Controls: The buttons on these headphones are well-placed and easy to access, allowing me to control playback and adjust the volume without needing to touch my phone. In summary, my headphone experience has been a mixed. While they have some drawbacks, such as the defective right side and sound leakage at

high volumes, the positive aspects like long battery life, excellent sound quality, and comfort make them a decent choice for daily use. I would recommend these headphones, especially for students. They offer excellent comfort, making them suitable for attending 6-7 hour long online lectures or studying online for extended periods. Additionally, they are quite durable, which makes them a good choice for working professionals. However, if you encounter a defective unit like I did, consider getting it replaced. It's also essential to be aware that the "Noise" company is known for its poor customer service, so keep that in mind before making a purchase decision.

Review Title: Okay-ish

Rating: 3

Review Text: Bought it for the inbuilt FM functionality (which doesn't work well to be honest). Rest is fine, BT connectivity dropped a lot the first day but now it is fine. It is too loud though, the lowest volume is not low enough. Treble is quite good but bass frequencies have issues. Comfort-wise it beats even high-end headphones. I am a sucker for light-weight headphones and these are the second-lightest ones I have ever worn. The ear cups are fine as well. They could have made them broader and this would have had the over-ear name. It also cancels a bit of noise physically. No ANC of course. I was about to return it after the first day but kept it anyway and don't regret. Good little headphones.

Review Text: Excellent sound quality You can feel the bass but it's not that great compared to its boat counterparts!! Design is very good Nd if you are a headphone user then you won't have ear pain problem like many of the comments are saying that Wearing them for long hours can give you irritation and ear pain as I am a headphone user it was comfortable for be.. Battery life is very good too... At last if you are a bass guy then go for boat but if you like sound to be more natural and decent bass then go for it!! Totally worth buying!!! (It's an original buyer comment not an noise imposter one LoL ■) But yeah one more thing You can feel something inside right cup of headphones like something is moving inside

it but it automatically got fixed in my case idk how... Best for Student purpose And decent for gym and gaming!!! (Don't worry of design it's lookin super cool)

Review Title: Budget Headphones

Rating: 4

Review Text: So, I got these headphones delivered 3 days ago and I have been using them 5hours everyday since then. Here are my views- 1.The build quality is decent. But, there are marks of My fingerprints on body. Also, the cushions are really good and these headphones are on ear not over ears one. 2. Battery life has been decent and due to type c port availability, it charges at decent speed. 3. Talking about comfort so my head and ears are big so these are not very comfortable but you can still wear them for around 1 hour and take break of 10 min after that. It is I think mainly designed for small ears. 4. Now, sound quality and bass has been very solid for this price range. 5. The biggest concern is noise leaking. After 50% you cannot go without making someone who is near you listen the song you are listening but for online classes and shows, voice leaking starts at 60-65%. Overall, these are decent headphones not for someone like me who has big ears, and if you want to purchase headphones without noise leaking then go with any other brand than noise. Forgot to mention that the quality of mic is okish and needs improving and sound canceling and anc is decent too not best. If you are getting a deal for 1300 or 1500 then purchase these. ■ bye

Review Text: This headphone is very ergonomic. Best thing i found is its fitting. It has a curve and this curvy design is perfectly fits with human skull. Has C type charging , micro SD card slot, FM and Aux slot. I am using it for running and gym purpose too. The head rest area has cushion too. Headphone can be extended using a metalic extender(not plastic one) with click lock system. It has a matte finish even. Sound is descent with good bass. It is foldable, but not rotatable. Only disadvantage is ear cushions are seems non removable. Perfect for day to day use like conference, interview, songs etc. Gaming I have not checked as i am not in to the gaming zone. Though it doesn't have ANC, there will be no distortion of voice as i am routinely talking over it using both bluetooth and aux cable. If u keep the volume around 70% , which is sufficient for me, doesn't make my ear hot and warm. U just need to adjust and fix accordingly using the extender. Perfect buy for me.

Design wise , I liked it more than rockerz 255 model.Bought the model blindly on its very first day with zero reviews and it was a wonderful choice I must say.Bluetooth 5.0 enables us to connect devices simultaneously. And vibration motor for calls , its too good.

Well this is called, quality engineering. Well, some people say Boat enhances bass and thus compensates with clarity, but I would give my neutral and true feedback Bass : 10/10 Clarity : 9/10 Comfort ease n looks : 15/10 Features : 10/10 The best buy from flipkart yet..

Review Text: This headphone is good but not that much as i expected*Pros- 1 Good battery backup 2 Good sound quality*Cons-1 There's a voice gap between video activity and voice. Voice comes after video activity not both comes together. It is ok when you watch movies and music but if you play pubg with it you will clearly feel the big gap it matters a lot for me. It is not working after 4 month very much disappointed Overall not good Don't buy please

It really ruins the experience, it hurts my ears. Mids are pretty good. Build quality is decent. Too much treble ruins the sound quality, that's why 3 stars. If treble was balanced then would have given it 4 or even 5 maybe.

Active noise cancellation is superb you did not hear anything around you when you plug and play. I previously used Mi basic after 1 year one side went not working. This one has better bass and sound clarity than Mi basic headset. Go for it guys

Review Text: It's nice overall mainly because of the low price. It has pressable button towards the outer part by pressing which one can receive/reject call, play/pause music. The bass is not upto the mark. Call quality is nice. But what else you need for such low cost. Good for those who don't like in-ear silicone earphones.

Review Title: Just wow!

Rating: 5

Review Text: It is definitely a good purchase at this price, those who don't care for loud bass and thing, they can go for this, these Airdopes are perfectly balanced in terms of sound, the sound doesn't breaks at high volumes, you can still enjoy your songs smoothly. The normal calling with this works perfectly, no as such issues there, but you may find bit issues on WhatsApp calls, as voice tends to break sometimes. You can use one airdope at a time and it works perfectly. Lastly, the battery backup, i...

Review Text: Good for the price Sound is loud and clear. Bass is there but not best as these are not in-ear type. Call quality is good. And battery lasts 3.5 hrs. Good thing is type-C I can use my OnePlus charger with it. Comfortable for long hours. Dont expect too much from the product at this price. I would say if you don't want to spend much then get this. And obviously if your priority is sound quality then Sony and Bose are only option.

Review Text: The earphone got delivered in 1 day. Speaking of sound quality the sound is good you get decent amount of base for the price. The design though is not upto the mark you cannot wear it for prolonged hours as it gets uncomfortable. The microphone is ok calling experience is ok not that great. Battery backups i cannot comment on that as I haven't used it a lot. But for the price that you are paying ,this thing is totally worth the buy.

Product Title: BoAt Airdopes 131 Bluetooth Headset

Review Title: Decent product

Rating: 3

Review Text: I wish to point out one very basic thing the earbuds are designed well but the material used for covering the sound outlet is no good it is in good brands its steel or metal based very fine mesh, in this case it just came out to be nothing but a cloth based thin layer pasted with low quality glue. Not a good experience. Earbud without this cover is firstly exposed and not so appealing anymore.

Review Text: It's a nice product in this price range, but I would say a few points which boat needs to work on:1. boat should manufacture protective covers for the outer case, as I feel that it's really fragile and I'm unable to find some cover.2. It would be really good if they would have added touch controls in it. 3. The blue led which flashes in every 5 second should be turned off. It gives a really cheap look.
